

Domestic Content Bonus Analysis and Certification

Project: Cottonwood Solar I (100 MWac / 135 MWdc)
Date: August 15, 2026

1. Results

Requirement	Result
Steel and iron (structural, 100% U.S.)	Satisfied
Manufactured products adjusted percentage	47.8%
Threshold applied	45% (construction beginning December 22, 2025)
Conclusion	Qualifies, based on the threshold applied

2. Basis for the Threshold

We applied the threshold for facilities beginning construction between June 16 and December 31, 2025, based on the independent engineer's confirmation that physical work of a significant nature began on December 22, 2025. At that threshold the Project qualifies for the domestic content bonus.
