

Prevailing Wage and Apprenticeship Compliance Report

Project: Cottonwood Solar I
Period covered: January 12, 2026 through September 15, 2026
Report date: September 22, 2026

1. Prevailing Wage

We reviewed certified payroll for the EPC contractor and 14 subcontractors. All laborers and mechanics were paid at or above the applicable Davis-Bacon general wage determination rates for the county. Two underpayments identified in March 2026 were corrected with interest within 30 days. Prevailing wage requirement: satisfied for the period reviewed.

2. Apprenticeship

Measure	Result
Total construction labor hours	412,000
Apprentice labor hours	54,384
Apprentice labor hours as % of total	13.2%
Required labor hour percentage	15.0%
Shortfall (labor hours)	7,416
Apprenticeship ratio and participation requirements	Satisfied

The labor hour requirement is not satisfied for the period reviewed. The Seller has not documented a Good Faith Effort exception for the shortfall.

3. Cure

The requirement may be cured by a penalty payment to the IRS for the labor hour shortfall. At \$50 per labor hour, the cure payment would be \$370,800. As of the report date, the payment has not been made; Seller has indicated it intends to make the payment before the placed-in-service date.
