

Domestic Content Bonus Analysis and Certification

Project: Cottonwood Solar I
Date: August 15, 2026

1. Results

Requirement	Result
Steel and iron (structural, 100% U.S.)	Satisfied
Manufactured products adjusted percentage	47.8%
Threshold applied	45% (construction beginning in 2025)
Conclusion	Qualifies, based on the threshold applied

2. Key Assumption

At the sponsor's instruction, we applied the threshold for facilities beginning construction in calendar year 2025. If construction is determined to have begun in 2026, the applicable threshold would be 50% and the Project would not qualify at the computed adjusted percentage.
